### DETAILED ACTION

Claims 6-9 are pending . IDS dated 8-7-06 has been acknowledged and considered. Claims 1-5 are cancelled.

#### Priority

Receipt is acknowledged of papers submitted under U.S.C. 119(a)-(d) which papers have been placed of record in the file.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is

Art Unit: 1625

advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Applicants claim a mixture comprising thiocloprid and one or more compounds acrinathrin, alpha-cypermethrin etc of claim 6. They also claim a method of combating animal pests comprising applying an effective amount of mixture containing one or more extenders or surface-active substances. This composition is prepared by mixing the mixture of thiocloprid and one or more compounds of claim 6 (Claims 6-9).

Claims 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Seitz et al (US 2005/0014650 A1). This PG PUB claims the priority of PCT/EP02/09866 which was published on March 27<sup>th</sup> 2003 in german (attached) and the english translation of the PCT is used as prior art.

Seitz et al teach delta 1-pyrrolines as pesticides. Their teachings include ready to use compositions comprising insecticides (Page 24, para [0591] lines 1-2). Their preferred mixing partners of insecticides are cypermethrin and thiocloprid (Page 24, para [0593] lines 1-5). Their teachings include use of active compounds including insecticides for controlling animal pests (Page 25, [para 0614] lines 1-7). They additionally teach pesticides comprising one or more

Art Unit: 1625

extenders and/or surface -active substances (Page 62, Claim 51). They also teach method of controlling pests comprising, causing an effective amount of one or more compounds to act on pests and /or their habitat. (Page 62, Claim 52).

Seitz et al clearly disclose the mixture of thiacloprid and cypermethrin. They also disclose mixing of these two insecticides. Their compositions contain extenders and /or surface active substances and these can be used as pesticides to act on pests and on their habitat as explained above and as claimed by applicants (Claims 6-9).

Thus based on Seitz et al teachings, it was obvious to an ordinary skilled artisan to prepare the composition containing a mixture of thiacloprid and cypermethrin with an extender and/or surface-active substance, and to use the composition as a pesticide to combat the pests and their habitat as claimed by applicants.

Thus there is reasonable expectation of success based on the prior teachings as set forth above in the instant office action.

### **Conclusion**

Claims 6-9 are rejected. No claims are allowed.
